LIST OF EXPERIMENT 9

9. Create a Snapshot of a VM and Test It by Loading the Previous Version

Aim

To create a snapshot of a Virtual Machine and test it by restoring the VM to its previous saved state using Oracle VirtualBox.

Procedure

1. Open **Oracle VirtualBox** and select the required Virtual Machine.
2. Start the Virtual Machine and ensure that it is working properly.
3. Shut down or save the state of the VM if required.
4. Select the VM and open the **Snapshots** section.
5. Click **Take Snapshot**.
6. Enter a suitable name and description for the snapshot.
7. Click **OK** to create the snapshot.
8. Start the Virtual Machine and make some changes, such as creating files or changing system settings.
9. Shut down the Virtual Machine.
10. Open the **Snapshots** section again and select the previously created snapshot.
11. Click **Restore** to return the Virtual Machine to its previous version.
12. Start the VM and verify that the changes made after creating the snapshot are no longer present.

Result

A snapshot of the Virtual Machine was successfully created. The VM was restored to its previous saved state, and the restoration was successfully verified.
