

SAVEETHA SCHOOL OF ENGINEERING
CSA 15- CLOUD COMPUTING AND BIG DATA ANALYTICS
LIST OF EXPERIMENT 10

10. Create a Clone of a VM and Test It by Loading the Cloned VM

Aim

To create a clone of an existing Virtual Machine and test the cloned Virtual Machine using Oracle VirtualBox.

Procedure

1. Open **Oracle VirtualBox**.
2. Select the Virtual Machine that needs to be cloned.
3. Right-click the selected VM and choose **Clone**.
4. Enter a suitable name and location for the cloned Virtual Machine.
5. Choose the clone type as **Full Clone** or **Linked Clone**.
6. Select the required option for copying the VM's current state and snapshots.
7. Click **Finish** to begin the cloning process.
8. Wait until the cloning process is completed successfully.
9. Verify that the cloned Virtual Machine appears in the VirtualBox Manager.
10. Select the cloned VM and click **Start**.
11. Verify that the cloned operating system and configuration load successfully.
12. Test the cloned VM to ensure that it works independently of the original VM.

Result

The Virtual Machine was successfully cloned using Oracle VirtualBox. The cloned VM was started and tested successfully, confirming that the cloned version was created and loaded properly.
