CSA 15- CLOUD COMPUTING AND BIG DATA ANALYTICS
LIST OF EXPERIMENT 16

16. Create and Configure a New VM Image in a Public Cloud

Aim

To create and configure a new Virtual Machine (VM) image using a public cloud service provider and demonstrate **Platform as a Service (PaaS)**.

Procedure

1. Log in to the **AWS Management Console**.
2. Navigate to the **EC2** service.
3. Click **Launch Instance** and select an appropriate operating system image, such as Ubuntu.
4. Select the required instance type and configure the network and security settings.
5. Launch the virtual machine using an appropriate key pair.
6. Connect to the VM using SSH.
7. Install and configure the required software, packages, and dependencies.
8. Verify that the configured applications and services are working correctly.
9. Create a custom AMI from the configured EC2 instance.
10. Provide a suitable name and description for the AMI and create the image.
11. Verify that the newly created AMI is available under **AMIs** in the EC2 dashboard.

Result

A new VM was successfully created, configured, and converted into a custom VM image (AMI) on the public cloud platform.
