

SAVEETHA SCHOOL OF ENGINEERING
CSA 15- CLOUD COMPUTING AND BIG DATA ANALYTICS
LIST OF EXPERIMENTS 7

7. Create a Virtual Machine with 1 CPU, 2GB RAM and 15GB storedisk using a Type 2 Virtualization Software, using virtual box.

Aim

To create a Virtual Machine using Oracle VirtualBox, a Type 2 Hypervisor, with 1 CPU, 2 GB RAM, and 15 GB virtual storage disk.

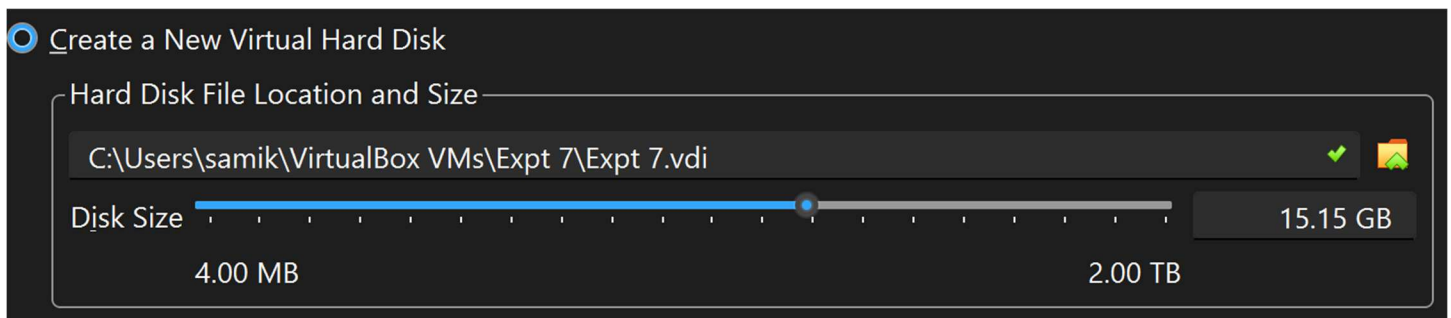

Procedure

1. Open Oracle VirtualBox on the computer.
2. Click the New button to create a new Virtual Machine.
3. Enter a suitable name for the Virtual Machine.
4. Select the required ISO image or operating system installation file.
5. Choose the operating system type and version.
6. Set the Base Memory (RAM) to 2048 MB (2 GB).
7. Set the number of Processors (CPU) to 1.
8. Create a virtual hard disk and set its size to 15 GB.
9. Choose the virtual disk file type and select dynamically allocated or fixed-size storage.
10. Complete the VM creation process.
11. Open Settings and verify:
 - CPU: 1 Processor
 - RAM: 2 GB
 - Storage Disk: 15 GB
12. Click Start to launch the Virtual Machine.
13. Install the operating system if required and verify that the VM runs successfully.

Result

A Virtual Machine was successfully created using Oracle VirtualBox, a Type 2 Virtualization Software, with 1 CPU, 2 GB RAM, and a 15 GB virtual storage disk.
