LIST OF EXPERIMENT 8

8. Create a Virtual Hard Disk and Allocate Storage Using VirtualBox

Aim

To create a **Virtual Hard Disk (VHD)** and allocate storage space to a Virtual Machine using Oracle VirtualBox.

Procedure

1. Open **Oracle VirtualBox**.
2. Select an existing Virtual Machine or click **New** to create a new VM.
3. During VM creation, select **Create a Virtual Hard Disk Now**.
4. Choose the required virtual disk file type, such as **VDI (VirtualBox Disk Image)**.
5. Select the storage allocation type as **Dynamically Allocated** or **Fixed Size**.
6. Specify the required disk size, for example **15 GB**.
7. Select the location where the virtual hard disk should be stored.
8. Click **Create** to create the virtual hard disk.
9. Open **Settings** → **Storage** to verify that the virtual hard disk is attached to the Virtual Machine.
10. Start the Virtual Machine and verify that the allocated storage is available.

Result

A Virtual Hard Disk was successfully created and the required storage space was allocated and attached to the Virtual Machine using Oracle VirtualBox.
